RELLONY RESCUE · YOUR 4-WEEK PLAN

The Example Grill

1 Example Street, London, E00 0XX

Made from your answers. Prepared 23 October 2026 · programme 23 October 2026 to 20 November 2026.

Two documents, one food safety system

1. **Your SFBB pack**
   The Food Standards Agency's own Safer food, better business for caterers (100 pages), filled in on your device from your answers. Check it, finish it, sign it and use it every day: it is your written food safety management system.
2. **This Rescue plan**
   From Rellony: where you stand, what to fix over the next 4 weeks, and where each fix goes in your SFBB pack. Rellony made this plan; the FSA did not.

Start with the steps marked TODAY on the plan, then work through the weeks. Keep this plan with your SFBB pack in the kitchen.

In this plan

Where you stand	2
How to use your SFBB pack	3
Your 4-week plan	4
Cleaning schedule — continued	9
Allergen matrix	10
Optional: daily fridge and freezer log	11
About this plan	12

SAMPLE — fictional business, invented answers. Council details are real.

Where you stand

Area the officer scored	Your score	Possible (lower is better)
Hygienic food handling	**15**	0 · 5 · 10 · 15 · 20 · 25
Structure, cleanliness and facilities	**15**	0 · 5 · 10 · 15 · 20 · 25
Confidence in management	**20**	0 · 5 · 10 · 20 · 30

Current rating: 1. Under the FSA's published scoring table, if your management score were 10 and the other two scores stayed the same, the table gives a rating of 2.

This is how the table works, not a forecast: at a re-visit the officer assesses everything again, and the rating can go up, down or stay the same. Source: FHRS Brand Standard (scoring table; Section 8, Q&A 14).

What 'confidence in management' looks for

The FSA's guidance for officers says this score is not only about documents: officers also weigh your food safety knowledge, how well you understand the hazards and control them, your attitude to food safety and your track record. A score of 20 describes things like insufficient food safety knowledge, a poor appreciation of hazards and controls, inadequate food safety procedures (for example Safer food, better business) or little progress since the last inspection, and staff not suitably trained. A score of 10 describes satisfactory procedures, or satisfactory progress towards them, with the significant hazards understood and controlled, records generally kept and staff generally trained. Your SFBB pack gives you the written procedures; using them every day, and making sure you and your staff understand them, is what an officer looks for.

Source: FHRS Brand Standard — confidence in management guidance and score descriptions, paraphrased.

Your council

Council	London Borough of Newham
Re-visit fee	£319 (from 1 April 2026) — Newham council website, checked 9 Oct 2026
Email	food@newham.gov.uk
Phone	020 3373 7709

Check the fee and how to apply in your own letter or on your council's website before you request a re-visit — fees and forms change.

What Rellony does — and doesn't

What you get

- the FSA's own Safer food, better business for caterers pack, filled in on your device from your answers — you check it, finish it and sign it;
- this Rescue plan: where you stand, a 4-week plan of the gaps in your answers, and where each fix goes in your SFBB pack;
- an allergen matrix to fill in, and an optional daily fridge and freezer log;
- your private pack page, where you tick off your steps as you go;
- answers to your emails about using your plan and your SFBB pack (rescue@rellony.com) within 2 working days, until support ends.

What Rellony does not do

- visit or inspect your premises, or check the work you do;
- contact your council or act on your behalf;
- decide or check allergen information;
- give legal advice, or professional advice specific to your premises;
- certify or approve your business;
- speak for the Food Standards Agency or your council — Rellony is independent of both;
- promise a rating — only the officer decides. Food safety stays your legal responsibility as the food business operator.

Your dates: programme 23 October 2026 to 20 November 2026 · email support until 27 November 2026 · this plan and its tools stay available until 23 October 2027.

How to use your SFBB pack

Your SFBB pack is the Food Standards Agency's Safer food, better business for caterers: 100 pages, unchanged except for the answers filled into its boxes. It was filled in on your own device from the FSA's file on GOV.UK — Rellony doesn't keep or send a copy. The page numbers in this plan are the numbers your PDF viewer shows (the pack doesn't print its own).

We filled in

- your business name and address (cover and diary);
- 26 written answers in the 'How do you do this?' boxes;
- 35 ticks, only where you told us you already do exactly what the pack asks;
- your dishes on 'Checking your menu' (pages 58–59);
- your extra checks and how often (page 67);
- your own opening or closing checks (pages 66 and 82);
- 11 items on the cleaning schedule (pages 91–92) — 10 more are on the 'Cleaning schedule — continued' page of this plan;
- 2 suppliers on the suppliers' list (pages 87–88);
- contacts (pages 89–90): London Borough of Newham — food safety team.

We left for you

- every 'Yes' your answers didn't support — your plan shows the page; tick it only once it is true;
- anything your answers didn't cover;
- your name, signatures and dates;
- staff names and training dates (Rellony doesn't store staff names);
- allergen details — only you can decide them, from your recipes and labels.

This week

1 **Make it yours**
Go through each section of the pack. Where we filled something in, check it says what really happens in your kitchen; if it doesn't, change it — every box can still be edited, on screen or by hand once printed.

2 **Sign it off**
As you finish each safe method, sign and date it on the safe method completion record (pages 78–79). Check the 'not relevant' ticks there too.

3 **Keep it where it's used**
You don't have to print all 100 pages. Keep the pack where you and your staff use it every day and can show it to an officer — on a phone, tablet or computer, or printed. Print the pages you write on by hand: the diary (pages 95–98) and, if you like, the cleaning schedule (pages 91–92) for the wall. The FSA says the diary can be kept electronically or on paper.

4 **Train your staff**
On each person's first day: the 'Working with food?' factsheet (page 9) and 'Washing hands effectively' (page 10). Then the safe methods for their work. Record it in the staff training record (pages 83–86).

Every day

5 **Checks and diary**
Do the opening and closing checks — the lists are on page 82, where we added your own checks. Fill in the diary (pages 95–98; a filled-in example is on page 94): tick the checks, write down anything that went wrong or was different and what you did, and sign. SFBB asks for the diary every day as a minimum; it doesn't ask you to keep lots of daily records (pack page 6).

Regularly

6 **Prove it**
Check now and then that your methods work — for example, probe a cooked or hot-held dish with a clean, disinfected probe — and note it on 'Prove it: records' (page 93).

7 **Keep the lists up to date**
Suppliers' list (pages 87–88), contacts (pages 89–90) and cleaning schedule (pages 91–92).

Every 4 weeks

8 **4-weekly review**
Walk round the kitchen and look back over the diary; write down problems and what you did (page 100; a filled-in example is on page 99). Your first one is in week 4 of this plan. The pack has 4 weeks of diary pages: before they run out, print more blank diary pages from the pack on GOV.UK.

Your 4-week plan

Every gap found in your answers is listed here once, by topic, in our practical wording of official guidance — mainly the FSA's Safer food, better business. If your officer told you something different, follow the officer. Tick each step when done and write the date; keep photos and receipts as evidence.

Your SFBB pack: under each topic, the safe method it belongs to. Where a step says 'When this is done: tick Yes on page …', we left that box blank because your answers showed a gap — tick it only when the step really is done.

TODAY — urgent

1. Foods that need extra care (rice, eggs, shellfish, fish)

In your SFBB pack: Foods that need extra care, pages 52–53

- ☐ 1.1 Stop leaving cooked rice at room temperature: keep it hot (63°C+) or cool it quickly and refrigerate. Done: _____
- ☐ 1.2 Cool rice fast: spread it thinly on clean trays or rinse under cold drinking water, then refrigerate. Done: _____
- ☐ 1.3 Label cooked rice with the time it was cooked and throw it away after 1 day. Done: _____
- ☐ 1.4 Rotate eggs and check best-before dates. Done: _____

2. Hand-washing basin

In your SFBB pack: Handwashing, pages 29–30

- ☐ 2.1 Put liquid soap at every hand basin today and add it to opening checks. Done: _____
- ☐ 2.2 Clear the hand basin and keep it for hands only — no food, equipment or washing up. Done: _____

3. Keeping raw and ready-to-eat food apart

In your SFBB pack: Separating foods, pages 17–18 · Clear and clean as you go, pages 34–35

- ☐ 3.1 Reorganise today: ready-to-eat food on the top shelves, raw meat, poultry, fish and eggs on the bottom. Label the shelves. Done: _____
- ☐ 3.2 Mark containers for raw and for ready-to-eat use, or wash and disinfect them between uses. Done: _____
- ☐ 3.3 Choose a control today: separate areas, or separate times with a two-stage clean in between — and separate, labelled or colour-coded boards and knives for raw and ready-to-eat food. Done: _____
- ☐ 3.4 Brief staff: bin packaging and string as soon as they come off, and clean and disinfect anywhere raw-food packaging touched. Done: _____
- ☐ 3.5 Store unwashed produce away from ready-to-eat food. Done: _____

4. Pests

In your SFBB pack: Pest control, pages 23–24 · Physical and chemical contamination, pages 21–22 · Clear and clean as you go, pages 34–35

- ☐ 4.1 Call a pest control contractor today. Clean and disinfect anything pests may have touched and throw away any food they may have touched. Deal with this before anything else. Done: _____
- ☐ 4.2 Remove any pest-control products from food areas; leave baiting to a contractor or follow the label exactly. Done: _____
- ☐ 4.3 Add 'no signs of pests' to your daily opening checks (SFBB) and do a weekly walk-round inside and outside (our recommendation). Done: _____
- ☐ 4.4 Add 'no food or dirty dishes left out' to closing checks. Done: _____
- ☐ 4.5 Choose a food-waste area away from preparation and add it to the cleaning schedule. Done: _____

When this is done: tick 'Yes' on page 35 of your SFBB pack (Clear and clean as you go).

WEEK 1 — Set up and fix the urgent things

5. Allergen cross-contact in the kitchen

In your SFBB pack: Food allergies (food hypersensitivity), pages 19–20 · Stock control, page 76

- ☐ 5.1 Write and brief an 'allergy order' routine: clean surfaces and equipment, wash hands, then prepare. Done: _____
- ☐ 5.2 Keep labels or specifications for every ingredient where staff can check them. Done: _____

- [ ] 5.3 Brief staff: 'may contain' on any ingredient label must be passed on to the customer. Done: _____
- [ ] 5.4 Mark allergy plates (e.g. a flag or separate tray) and have the person who took the order check it. Done: _____
- [ ] 5.5 Set aside (and label) a board, knife and utensils for allergy orders. Done: _____
- [ ] 5.6 Decant opened food, including tins, into sealed food containers labelled with the name, ingredients and date; don't re-use foil, cling film, freezer bags or food packaging. Done: _____

6. Allergen information for customers

In your SFBB pack: Managing food allergen information, pages 70–72

- [ ] 6.1 Write down the allergens in every dish (the 14 regulated allergens) — use the allergen matrix in your Rescue plan, and keep labels or specifications to back it up. Done: _____
- [ ] 6.2 Display a sign telling customers to ask staff about allergens (a legal requirement if information is given orally). Done: _____
- [ ] 6.3 Show every staff member where the allergen information is kept. Done: _____

  When this is done: tick 'Yes' on page 70 of your SFBB pack (Managing food allergen information).
- [ ] 6.4 Check labels of substitutes before use. Done: _____
- [ ] 6.5 Train staff on taking allergy orders by phone or online. Done: _____

  When this is done: tick 'Yes' on page 71 of your SFBB pack (Managing food allergen information).
- [ ] 6.6 Allergen information must also be available at delivery: label allergy orders (or include the information) when they go out. Done: _____
- [ ] 6.7 Add key allergens to dish descriptions (e.g. 'sesame dressing'). Done: _____

  When this is done: tick 'Yes' on page 70 of your SFBB pack (Managing food allergen information).

7. Chilled storage and display

In your SFBB pack: Chilled storage and displaying chilled food, pages 40–41 · Ready-to-eat food, pages 62–63

- [ ] 7.1 Check every fridge today with a fridge thermometer or probe and set them to 5°C or below. If any reads above 8°C, throw away chilled food that has been above 8°C for more than 4 hours (if you don't know how long, ask your council's environmental health team). Done: _____
- [ ] 7.2 Start labelling all prepared and opened food today (date made/opened + use by: max 3 days in total for high-risk ready-to-eat food unless you have evidence). Done: _____
- [ ] 7.3 Apply the 'day + 2' rule to all high-risk ready-to-eat food. Done: _____

8. Cooling hot food

In your SFBB pack: Chilling down hot food, pages 42–43

- [ ] 8.1 Pick a quick-cooling method today (small portions, shallow trays, cold water/ice baths) and stop leaving food to cool slowly. Done: _____
- [ ] 8.2 Chill food down as quickly as possible and put it into the fridge as soon as it has cooled — never leave it out to cool slowly. Done: _____

9. Daily diary and opening/closing checks

In your SFBB pack: Diary — 4 weeks, pages 95–98 · Training and supervision, pages 73 and 83–86

- [ ] 9.1 Start the diary in your SFBB pack today: opening and closing checks, anything that went wrong and what you did, signed every day. Done: _____
- [ ] 9.2 Choose and train a deputy for the diary. Done: _____

10. Hot holding

In your SFBB pack: Hot holding, pages 60–61 · Reheating, pages 54–55

- [ ] 10.1 Reheat food fully first, then put it into hot holding — never cook or reheat in the bain-marie or other hot-holding equipment. Done: _____
- [ ] 10.2 Keep hot-held food at 63°C or above: probe it regularly, note the readings in the Prove it records, and adjust the setting or portion size if it is below 63°C. Done: _____

11. Ready-to-eat food and washing produce

In your SFBB pack: Ready-to-eat food, pages 62–63

- ☐ 11.1 Separate ready-to-eat food from raw food in storage and preparation, starting today. Done: _____
- ☐ 11.2 Two-stage clean surfaces and equipment before every ready-to-eat task. Done: _____
- ☐ 11.3 Two-stage clean after soil-covered vegetables. Done: _____

12. Temperature records ("Prove it")

In your SFBB pack: Separating foods, pages 17–18 · Chilled storage and displaying chilled food, pages 40–41 · Cooking safely, pages 50–51 · Reheating, pages 54–55 · Chilling down hot food, pages 42–43

- ☐ 12.1 Buy a digital probe thermometer and probe wipes; check it in iced and boiling water before first use. Done: _____
- ☐ 12.2 Check the temperature of every fridge and chilled display at least once a day, starting with your opening checks; write any problem and what you did in the diary. Done: _____
- ☐ 12.3 Prove your checks: regularly probe the centre of key dishes with a clean, disinfected probe and note the readings in the Prove it records (SFBB calls a probe the best way to make sure cooking is safe). Done: _____
- ☐ 12.4 Prove your check: regularly probe reheated dishes with a clean, disinfected probe and note the readings in the Prove it records. Done: _____
- ☐ 12.5 Optional but useful (SFBB): test your cooling method once with a probe — record the temperature straight after cooking and at regular intervals in the Prove it records. Done: _____

13. Training and supervision

In your SFBB pack: Staff training record, pages 83–86 · Training and supervision, pages 73 and 83–86 · Managing food allergen information, pages 70–72 · Cleaning effectively, pages 31–33

- ☐ 13.1 Train every food handler on the safe methods for their work — start with the pack's 'Working with food?' factsheet on their first day — and record it in the staff training record. Done: _____
- ☐ 13.2 Train all staff on allergen requests (the 'Managing food allergen information' safe method in your SFBB pack; the FSA website also has allergy and intolerance training). Done: _____

  When this is done: tick 'Yes' on page 70 of your SFBB pack (Managing food allergen information).
- ☐ 13.3 Use the staff training record in your SFBB pack for every session. Done: _____
- ☐ 13.4 Train all staff on the two-stage clean (the 'Cleaning effectively' safe method in your SFBB pack) and record it in the staff training record. Done: _____
- ☐ 13.5 Plan refresher training in the 4-weekly review. Done: _____
- ☐ 13.6 Train staff on the safe methods now (required); consider a food hygiene course and the allergy and intolerance training on the FSA website, and keep certificates as evidence. Done: _____

14. Written food safety management system

In your SFBB pack: Safe method completion record, pages 78–79

- ☐ 14.1 Check every page of your SFBB pack against what really happens in your kitchen, fill in anything left blank, then sign and date the safe method completion record; keep the pack in the kitchen where staff can use it. Done: _____

WEEK 2 — Make it routine

15. Cleaning standards

In your SFBB pack: Cleaning effectively, pages 31–33 · Clear and clean as you go, pages 34–35

- ☐ 15.1 Check the label this week; if it doesn't state BS EN 1276 or BS EN 13697, replace it. Done: _____
- ☐ 15.2 Clear clutter from work surfaces and set a place for dirty equipment. Done: _____
- ☐ 15.3 Clean floors after food preparation has finished. Done: _____

16. Cooking thoroughly

In your SFBB pack: Cooking safely, pages 50–51

- ☐ 16.1 Don't re-use raw marinade unless it is cooked until steaming hot. Done: _____

17. Handwashing practice

In your SFBB pack: Handwashing, pages 29–30

- ☐ 17.1 Add 'soap and towels stocked' to opening checks. Done: _____
- ☐ 17.2 Watch for handwashing at key moments during each shift and correct on the spot. Done: _____
- ☐ 17.3 Brief staff: gloves never replace handwashing; change them between raw and ready-to-eat tasks. Done: _____

18. Cleaning schedule

In your SFBB pack: Cleaning schedule, pages 91–92

- ☐ 18.1 Check the cleaning schedule in your SFBB pack (filled in from your answers), put a copy on the wall and follow it; look at it again at every 4-weekly review. Done: _____

19. Cloths

In your SFBB pack: Cloths, pages 15–16 · Clear and clean as you go, pages 34–35

- ☐ 19.1 Clean surfaces between tasks, and before any ready-to-eat preparation use a new disposable cloth or one that has been freshly cleaned and disinfected. Done: _____
- ☐ 19.2 Change re-usable cloths between tasks; keep enough clean cloths so this is easy. Done: _____
- ☐ 19.3 Switch to disposable cloths or paper towels for wiping surfaces, spills and hands. Done: _____

  When this is done: tick the box on page 16 of your SFBB pack (Cloths).
- ☐ 19.4 Choose one place for dirty cloths so they aren't picked up again before washing. Done: _____

20. Defrosting

In your SFBB pack: Separating foods, pages 17–18

- ☐ 20.1 Defrost raw food in a covered container on the bottom shelf. Done: _____

21. Food-washing sink

In your SFBB pack: Separating foods, pages 17–18

- ☐ 21.1 Clean and disinfect the sink before washing produce and use a dedicated bowl; never use the hand basin for food. Done: _____

22. Personal hygiene and fitness to work

In your SFBB pack: Personal hygiene and fitness to work, pages 13–14

- ☐ 22.1 Adopt the 48-hour rule and check it before anyone returns after illness. Done: _____

  When this is done: tick 'Yes' on page 14 of your SFBB pack (Personal hygiene and fitness to work).
- ☐ 22.2 Keep spare or disposable aprons near the raw-food area and change them after raw-food tasks. Done: _____
- ☐ 22.3 Make 'no watches or jewellery' a rule and check it at the start of each shift. Done: _____

  When this is done: tick 'Yes' on page 13 of your SFBB pack (Personal hygiene and fitness to work).
- ☐ 22.4 Stock brightly coloured (e.g. blue) waterproof dressings in the first-aid kit. Done: _____
- ☐ 22.5 Ask staff to change into work clothes at work, not travel in them. Done: _____

  When this is done: tick 'Yes' on page 13 of your SFBB pack (Personal hygiene and fitness to work).

23. Reheating

In your SFBB pack: Reheating, pages 54–55

- ☐ 23.1 Preheat before reheating. Done: _____
- ☐ 23.2 Stir and stand microwaved food and probe it in several places. Done: _____

24. Repair of floors, walls, ceilings, doors and surfaces

In your SFBB pack: Maintenance, pages 25–26

- ☐ 24.1 Arrange repairs for each item of structural damage; photograph before and after. Done: _____

25. Stock control and deliveries

In your SFBB pack: Stock control, page 76 · Freezing, pages 46–47 · Suppliers and contractors, pages 75 and 87–90

- ☐ 25.1 Check use-by dates every day at closing and throw away anything on or past its date. Done: _____
- ☐ 25.2 Label everything you freeze with the date. Done: _____

☐ 25.3 Probe-check chilled deliveries now and then and note it in the Prove it records. Done: _____

☐ 25.4 Use cool boxes for cash-and-carry trips and unload chilled and frozen food first. Done: _____

26. Ventilation and extraction

In your SFBB pack: Maintenance, pages 25–26

☐ 26.1 Clean or replace the extraction filters and add them to the cleaning schedule. Done: _____

27. Acrylamide

In your SFBB pack: Acrylamide, pages 56–57

☐ 27.1 Deep-fry below 175°C (check the fryer thermostat). Done: _____

☐ 27.2 Filter and change oil, and clean fryers, as often as needed. Done: _____

When this is done: tick the box on page 57 of your SFBB pack (Acrylamide).

28. Freezing

In your SFBB pack: Freezing, pages 46–47

☐ 28.1 Freeze food straight after delivery, preparation or chilling down. Done: _____

When this is done: tick 'Yes' on page 46 of your SFBB pack (Freezing).

☐ 28.2 Portion food before freezing. Done: _____

When this is done: tick 'Yes' on page 46 of your SFBB pack (Freezing).

WEEK 3 — Check and tighten

29. Physical and chemical contamination

In your SFBB pack: Physical and chemical contamination, pages 21–22

☐ 29.1 Consider a 'no glass in the kitchen' rule. Done: _____

30. Clear and clean as you go

In your SFBB pack: Clear and clean as you go, pages 34–35

☐ 30.1 Fit strainers to sink plugholes. Done: _____

When this is done: tick 'Yes' on page 35 of your SFBB pack (Clear and clean as you go).

Every week, alongside the plan

Week 1 Set up and fix the urgent things	• Go through your SFBB pack page by page: check what we filled in, finish what you can, and sign each finished safe method on the completion record. • Keep your SFBB pack where you and your staff use it every day — on a device or printed (only the pages you write on, such as the diary, need printing). • Start the diary today: opening and closing checks, signed every day. • Check fridges, chilled displays and freezers at least once a day, starting with your opening checks. • Go through the 'Working with food?' factsheet and 'Washing hands effectively' in your SFBB pack with every member of staff, and record it in the staff training record. • Put a copy of your cleaning schedule on the wall. • Do every 'urgent' and week-1 action in your plan.
Week 2 Make it routine	• Keep the diary every day: opening and closing checks, and anything that went wrong and what you did. • Do your weekly extra checks and note them in the diary. • Do your Prove it checks regularly (for example, probe a cooked, hot-held or chilled food) and note them in the Prove it records. • Do the week-2 actions in your plan.
Week 3 Check and tighten	• Check your probe's accuracy (iced and boiling water) and record it. • Watch each member of staff do one key task (handwashing, cleaning, an allergy order) and give feedback. • Do the week-3 actions in your plan. • Take photos of fixed items for your evidence.
Week 4 Review and get ready	• Do the 4-weekly review (owner). • Update the allergen matrix and cleaning schedule if anything changed. • Check that every step in your plan is done, ticked and dated. • Gather your evidence: diary pages, Prove it records, training record, photos, receipts.

Cleaning schedule — continued

The cleaning schedule in your SFBB pack (pages 91–92) has room for 11 items. These are the rest of the items from your answers, in the same columns. Keep this page with the schedule and follow both.

Item	Frequency of cleaning	Precautions	Method of cleaning
Walls and ceilings	Monthly		Detergent
Storage areas and shelves	Weekly		Detergent
Waste areas and drains	Weekly	Wear gloves	Detergent, then Sanitiser X (contact time as the label says)
Microwave	Daily	Wear gloves	Detergent, then Sanitiser X (contact time as the label says)
Ovens and grills	Weekly		Detergent
Fryers (filter or change oil; clean)	Weekly		Detergent
Hot-holding and display cabinets	Daily	Wear gloves	Detergent, then Sanitiser X (contact time as the label says)
Extractor canopy and filters	Weekly		Detergent
Staff areas and toilets	Daily	Wear gloves	Detergent, then Sanitiser X (contact time as the label says)
Customer and self-service areas	Daily	Wear gloves	Detergent, then Sanitiser X (contact time as the label says)

Two-stage clean = clean first, then disinfect and leave for the contact time on the label. Dilute chemicals exactly as the label says. The 'Cleaning effectively' safe method in your SFBB pack (pages 31–33) explains it.

Allergen matrix

Fill this in yourself from your recipes and the labels of every ingredient (including oils, sauces and garnishes). Put an X where a dish contains the allergen. Update it whenever a recipe, ingredient or supplier changes. Rellony does not decide which allergens are in your food. The 'Managing food allergen information' safe method in your SFBB pack (pages 70–72) explains what you must do.

Dish	Celery	Gluten	Crust-aceans	Eggs	Fish	Lupin	Milk	Mol-luscs	Mus-tard	Nuts	Pea-nuts	Sesame	Soya	Sul-phites
Chicken curry														
Lamb curry														
Vegetable curry														
Pilau rice														
Plain rice														
Beef burger														
Chicken burger														
Chicken wings														
Chips														
Naan bread														
Side salad														
Mint sauce														

Checked by: _____ Date: _____ Next review: _____

Optional: daily fridge and freezer log

SFBB doesn't require this log: it asks you to check your fridges and chilled displays at least once a day, starting with your opening checks (pack page 41), and to write in the diary when something goes wrong. Some owners also write down one reading a day as extra evidence of their checks. Fridges: food at 8°C or below (set at 5°C or below). Freezers: -18°C or below.

Day	Fridge 1	Fridge 2	Freezer 1	If out of range: what you did	Init.

Safer food, better business for caterers: https://www.gov.uk/government/publications/safer-food-better-business-for-caterers

This plan was made by Rellony's software, using fixed rules, from your answers. No one from Rellony has seen or assessed your premises. It is information to help you comply, not legal advice, and it cannot guarantee any food hygiene rating — the officer decides at inspection. Where your officer's instructions differ from this plan, follow the officer.

Your SFBB pack is the FSA's own PDF from GOV.UK, unaltered: only its form boxes were filled in, on your device, from your answers. You, as the food business operator, are responsible for checking that it describes what really happens in your kitchen, completing it and following it.

Allergen information is never decided by Rellony or by software: fill in the allergen matrix from your own recipes and labels.

What Rellony does — and doesn't

What you get

- the FSA's own Safer food, better business for caterers pack, filled in on your device from your answers — you check it, finish it and sign it;
- this Rescue plan: where you stand, a 4-week plan of the gaps in your answers, and where each fix goes in your SFBB pack;
- an allergen matrix to fill in, and an optional daily fridge and freezer log;
- your private pack page, where you tick off your steps as you go;
- answers to your emails about using your plan and your SFBB pack (rescue@rellony.com) within 2 working days, until support ends.

What Rellony does not do

- visit or inspect your premises, or check the work you do;
- contact your council or act on your behalf;
- decide or check allergen information;
- give legal advice, or professional advice specific to your premises;
- certify or approve your business;
- speak for the Food Standards Agency or your council — Rellony is independent of both;
- promise a rating — only the officer decides. Food safety stays your legal responsibility as the food business operator.

Your dates: programme 23 October 2026 to 20 November 2026 · email support until 27 November 2026 · this plan and its tools stay available until 23 October 2027.
